Refinery Situation Remains Unchanged

The refinery situation in West Tulsa remains unchanged and the sealing off of the railroad strike has not materially affected the refiners in West Tulsa.

It is the opinion of the press quoted last night that the strike is resumed their work yesterday morning, and that it would be several days before things would be normal again.

In an interview with the various refiners in West Tulsa, they are very much elated over the good news that state that it will be at least three or four days before they can begin to run full capacity once more.

The Constantine refinery suspended operations as announced in yesterday's paper, but expects to be in operation again within the next few days. Of course, will take some little time for them to get back to normal once more and the railroad strike has done them no little damage.

One of the most serious situations that has ever happened to the oil industry was narrowly avoided when the strikers returned to their work.

Refiners Association Makes Announcement

It has come to our notice that a certain local traffic association has given out interviews at various times claiming credit for obtaining adjustments in oil freight rates that affect the movement of refined products and interstate.

The statement made in the Tulsa World the morning of August 12 that this association and its secretary had finally secured an adjustment upon the crude oil rates from Texas producing points to Oklahoma refining points, the language of such interview seeming to give the impression that said association was due the entire credit for all adjustments without their efforts.

No adjustment or relief would have been granted.

Now it is the knowledge of the Tulsa Refiners Traffic Managers association of the Western Petroleum Refiners association members, that these interviews and news items and especially the claim above referred to on adjustment of Texas crude rates are misleading and without foundation of fact. On the contrary they are the result of the general increase of the oil refiners of the mid-continent field, the initiative, prosecution, exhibits, data and records have been furnished entirely and completely by the Western Petroleum Refiners association, through their commerce council, Clifford Thorne, with the assistance of the individual traffic organizations of the members of the Western Petroleum Refiners association.

Further that said local traffic association has been repeatedly requested to refrain from taking any action in these general adjustments and to confine their activities to the requests and personal problems of its subscribers, which if mutual with the problems of the members of the Western Petroleum Refiners association, will association would be more than pleased to accept and give assistance, in order that our complaints and requests for adjustments would be uniform. This attitude has been consistently ignored by the local organization and in fact their intervention has been more harmful than helpful.

In closing we wish to state that all rate adjustments affecting the oil market in the mid-continent and mid-continent fields have been secured by the Western Petroleum Refiners association through their commerce counsel, Clifford Thorne of Chicago, but in the particular case covering rates on crude oil from north Texas to Oklahoma and Kansas as referred to in the Tulsa World of August 12, Congressman R. B. Howard is due unlimited credit for the assistance he rendered in securing an expedited hearing.

(Signed)
Tulsa Refiners' Traffic Managers Association.

Good Well Near Oilton

Frank and others No. 1 McGee in the center of south line of northeast of southeast of 11-12-27 got up of the sand at 2,515 feet and have drilled to 2,540 feet and well is now.

Wanted, Drilling Proposition. Will drill good looking acreage in Beggs district for interest. Phone 8589, 244 Kennedy—Advt.

For sale—String of tools with contract. Will sell at low figure for quick action. Address N. A. post office box 128, Tulsa, Okla.—Advt.

Oil and gas leases for sale on Quay county, New Mexico land. Choose leases close to wells now drilling. For information phone 8560, Harry G. Haigh, 216 Ault Bldg.

Contractor wanted, National or 28 Star machine to drill in 24-24-27, phone 2828 or 2848, West Bros & Wren, Tulsa, Okla.—Advt.

FOR SALE—5-3 interest in well equipped lease, 2 wells having about 10 barrels. Going to develop lease at once. Price \$1,000 an acre or would consider selling 1/2 interest for \$500. Phone 8589—Advt.
